

SMT Data Line EMI Filters – TTDLF

We now offer an even more economical version of this series: PDLF.

The PDLF is electrically identical and fits the same land pattern. For the TTDLF 10000, please consider our CCDLF10000. We will, however, continue to produce the TTDLF series indefinitely.

Coilcraft surface mount filters are designed to virtually eliminate the problem of conducted EMI in data line applications. They provide exceptional common mode noise attenuation from 15 MHz to 300 MHz while passing signal line data below 300 MHz with minimal attenuation.

These low resistance filters have been designed for excellent electrical isolation (300 Vrms), environmental stability and low cost.

These data line EMI filters come in 10, 8, 4, 3 and 2-line versions with DC current capacity of 500 or 100 mA.

1. When ordering, please specify **termination** and **packaging** codes:

TTDLF 2500L D

TTDLF (except TTDLF 10000)

Termination: L = RoHS compliant tin-silver-copper over silver-platinum-glass frit.
Special order: S = non-RoHS tinlead (63/37).

Packaging: C = 7" machine ready reel. EIA-481 embossed plastic tape (500 parts per full reel).
B = Less than full reel. In tape, but not machine ready. To have a leader and trailer added (\$25 charge), use code letter D instead.
D = 13" machine ready reel. EIA-481 embossed plastic tape (2200 parts per full reel).

TTDLF 10000

Termination: L = RoHS compliant tin-silver-copper over nickel over moly-mag.
Special order: S = non-RoHS tinlead (63/37).

Packaging: D = 13" machine ready reel. EIA-481 embossed plastic tape (1000 parts per full reel).
B = Less than full reel. In tape, but not machine ready. To have a leader and trailer added (\$25 charge), use code letter D instead.

2. Current rating is for each line.

3. Inductance is per winding, tested at 1 MHz.

4. Operating temperature range -40°C to +85°C.

5. Electrical specifications at 25°C.
