◆ Precautions for Use

1.Recommended Temperature Profile (SMT)	 <p>Note 1 : Up to 2 cycles of Reflow soldering are possible under the same conditions, provided that there is a return to normal temperature between the first and second cycle.</p> <p>Note 2 : The temperature profile indicates the temperature of the surface of the connector lead.</p>
2.Recommended Manual Soldering Condition (SMT)	Soldering iron temperature : 350°C, Soldering time : Within 3 seconds
3.Recommended Screen Thickness and Open Area Ratio(Pattern Area Ratio)	0.12mm Open area ratio : 70%
4.Board Warp(SMT)	Maximum 0.02mm in the connector center area, based on both connector edges
5.Cleaning Condition	Refer to "Nylon Connector Use Handbook".
6.Cautions	<ul style="list-style-type: none"> ■ The receptacle is designed with the contacts exposed. Touching the contacts with bare hands may cause contact failure or damage to the device due to static electricity. ■ Insertion/extraction when not mounted to the board may result in damage or contact deformation. ■ Avoid securing the board only with the connector. Please use other methods to secure the board. ■ Excessive prying during insertion and extraction may result in damage. ■ Do not apply flux that will result in flux rise during manual soldering. ■ The color of the mold may differ slightly depending on the production lot however this does not affect the performance.
