### **MOUNTING**

The capacitors are designed for automatic placement on to printed-circuit boards.

Optimum dimensions of soldering pads depend amongst others on soldering method, mounting accuracy, print layout and / or adjacent components.

For recommended soldering pad dimensions, refer to Fig. 3 and Table 3.

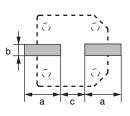

### **SOLDERING**

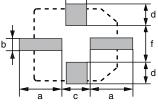

Soldering conditions are defined by the curve, temperature versus time, where the temperature is that measured on the component during processing.

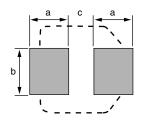

For maximum conditions refer to Fig. 4.

Any temperature versus time curve which does not exceed the specified maximum curves may be applied.

As a general principle, temperature and duration shall be the **minimum** necessary required to ensure good soldering connections. However, the specified maximum curves should never be exceeded.

Case size Ø D  $\leq$  10 mm

Case size Ø D = 12.5 mm

Case size Ø D ≥ 16 mm
