

AQ4020 Series 2.5pF, 30A Discrete TVS Diode

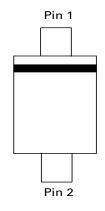

Description

The AQ4020 components integrate low capacitance steering diodes with one or two avalanche breakdown diodes for unidirectional or bidirectional protection, respectively, to protect against ESD and lightning induced surge events. These components can safely absorb up to 30A per IEC 61000-4-5 $2^{\rm nd}$ edition (t $_{\rm p}$ =8/20 μ s) without performance degradation and a minimum $\pm 30 {\rm kV}$ ESD per IEC 61000-4-2 International Standard. The low loading capacitance and high surge capability make it ideal for protecting telecommunication ports such as Ethernet and other high speed data interfaces.
