

Wire-to-Board Swing-Lock Connector for Low-Profile Power Source

DF61 Series

■Features

1.Reinforced Swing Lock Structure

Our unique swing-lock structure cradles the wire side plug and resists the plug from becoming disengaged due to handling strain or loads.

2. Header Lock Improves Plug Retention

During mating, the header lock engages with the plug assembly. The lock is reinforced with metal which adds strength to the lock and increases the retention between the header and the plug.

3.Compact Size- High Voltage

The compact 2.2mm pitch connector has a voltage rating of 350V due to the long creep distance.

4. Solder Wicking Prevention

Header is molded in one piece. This ensures a tight fit between the contact and the header and prevents solder wicking.

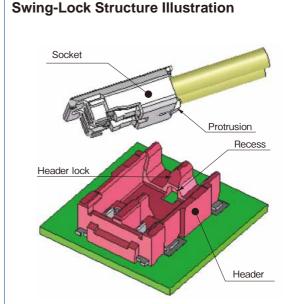

5. High Current of MAX 5 Amps (22AWG)

A highly conductive material is used for the contacts. The material provides for a high current flow by reducing the contact resistance.

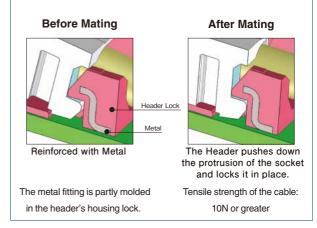

Applications

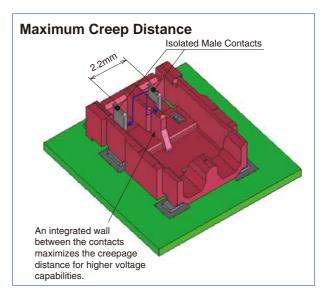

Digital cameras, digital video cameras, LED lights, laptop computers, tablet computers, portable devices, power supply equipment, etc.

(UL/C-UL Standard Certified Product)

The protrusion on the bottom side of the socket fits into a corresponding recess on the header. This aligns the socket into the correct mating position.

Items	Specifications	Conditions		
1.Insulation resistance	1000MΩ or greater	Measured at DC 500V		
2.Withstanding voltage	No flashover or breakdown	AC 1700V applied for 1 minute		
3.Contact resistance	10mΩ or less	Measured at 20mV or less, 1mA		
4 Mihyatian yasiatanas	No electric cutous of 1 us or more	Frequency 10-55Hz, half amplitude 0.75mm,		
4. Vibration resistance	No electric outage of 1 μ s or more	10 cycles for each of 3 directions		
5.Shock resistance	No electric outage of 1 μ s or more	Acceleration 490 m/s², 11ms; half sin wave: 3 each for 3 directions		
6. Humidity resistance Contact resistance $20m\Omega$ or less, insulation resistance $500M\Omega$ or greater		Temperature 40 \pm 2°C, humidity 90-95%, left for 96 hours		
7.Temperature cycle	Contact resistance $20m\Omega$ or less insulation resistance $500M\Omega$ or greater	5 cycles (-55°C : 30 minutes → 5-35°C : 2-3 minutes → 85°C : 30 minutes → 5-35°C : 2-3 minutes)		
8.Insertion/extraction life	Contact resistance 20mΩ or less	Insertion/extraction : 30 times		
9.Solder heat resistance	No melting of resin part affecting performance	Reflow : Per recommended temperature profile Hand solder : Manual soldering iron 350±10℃ for 3 seconds		

Note 1: Includes temperature elevation by conduction.

Note 2: Apply to unused product on packaged condition.

Note 3: The above specifications are representative for this series. Please refer to "delivery specifications" for official individual agreement.

Note 2: When non-authorized tools are used, please consult with Hirose sales representative about provision of the drawing of the crimping tool.

Crimping Precautions

Items required prior to start crimping

The work-related documents shown below are required before starting the harness connections.

(The mark shows the document required.)

When the documents shown below are not available, ask our sales personnel to provide them.

Document Title	Description	Automatic Crimping Machine	Hand Crimping Tool	Remarks
(1) Main unit of crimping machine instruction manual	Explanation of main press machine unit	•	_	When purchasing main press machine unit, it is bundled.
(2) Operating Instructions for Applicator	Crimp operation	•	_	
(3) Applicator Spare Parts Identification	Explanation for Applicator installation	•	_	M/han nurahasing Applicator
(4) Crimp Conditions	Standard values of : Crimp height ; Tensile strength		When purchasing Applicator, t is bundled.	
(5) Crimp Quality Standards	Various standards for crimping conditions	•	_	
(6) Operating Instructions for Hand Tool	Inspection items of : Crimp height ; Crimp operation Tensile strength	_	•	When purchasing Hand Tool, it is bundled.
(7) Cable Assembly Procedure	Cable Assembly Procedure	•	•	Ask our sales personal to provide them.

Tools

When crimping work is applied to our contacts, the tool designated by Hirose should be used.

*Crimping work by using tools other than as designated must not be done because it may result in contact failure, disconnection of cable, etc.

*The operating instructions manual is available for the crimping machine and the applicator. Be sure to carefully read the operating instructions manual before implementing the work.

Applicable electric wires

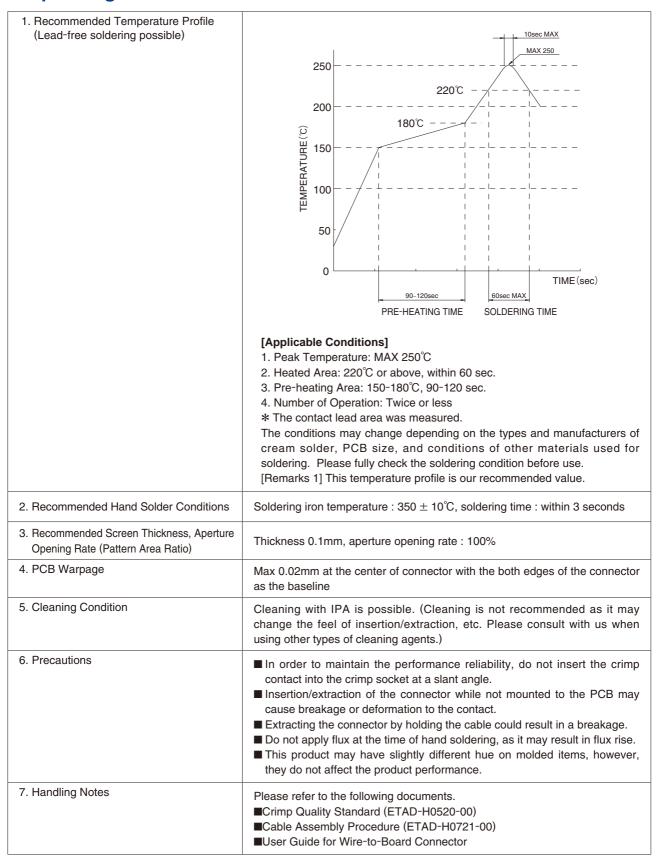

Check that the electric wire to be used is in the range of application.

If you intend to use an electric wire other than the recommended one, ask our sales personnel.

- · Electric wires that are applicable for crimping connectors shall, principally, be the tin-plated stranded softcopper wire.
- · Crimping of electric wires wherein single wires, polyester yarns, etc., exist and crimping of tin-coated wires should be avoided
- Avoid crimping two electric wires together.
- The setting values of crimp height (Note 1) may vary between tin-plated and gold-plated terminals even if the same electric wires are used.
- · The setting values of crimp height (Note 1) may vary depending on the difference in the core wire configuration even if the computed cross-sectional area is the same.

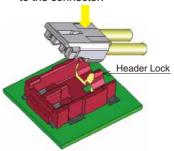

Note 1: The crimp height is an important item that determines crimping quality. We execute crimping tests for each electric wire to ensure the optimal value for the crimp height with high precision, thereby ensuring optimal setup values.

Operating Precautions

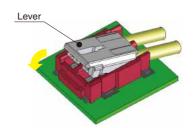

8. Mating/Un-mating **Mating Operation**

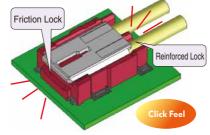

(1) Start by placing the connector against the header lock at an angle. If the plug is not started at an angle, it will cause damage to the connector.

(2) Then, in a slight, rotating movement, push the front section of the plug down.

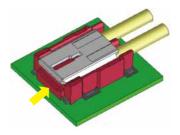

(3) Keep pressing down until a "click" feeling is sensed. The connector is now fully and properly mated.

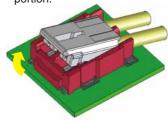

Un-mating Operation

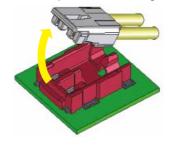

(1) Begin by lifting up on the front section of the plug.

(2) Continue to rotate it upwards and release the friction lock portion.

(3) Once the rear, or reinforced lock, is released the plug will come free from the header and complete the un-mating sequence.
